

## AFTERMARKET ACCESSORIES & SERVICES

### ROUTINE PREVENTIVE MAINTENANCE KITS (RPM KITS)

Now, we have reduced your burden of buying individual parts for servicing your Miltonroy Emag & Mechanical pumps. Order for a suitable RPM kit for servicing your pump. Single part code, easy to stock and use. Kits available for servicing drive end and liquid end separately. Watch out for the Miltonroy Genuine hologram on the pack. Few models available through Amazon.in too.

### SPECIAL MATERIAL ACCESSORIES

Get ready to handle the most corrosive and harsh chemicals like Hydrochloric acid / Sulfuric acid / Ferric, with the Miltonroy Genuine PVDF / PTFE / PVC / PP accessories for Emag & Mechanical series dosing pumps. Foot valves, Anti-Syphon Valves, tubes of matching sizes available in stock at your nearest Miltonroy Channel Partner. Checkout our range of check Valve Balls made of SS, PTFE, Glass, Hastalloy-C, Ceramic, etc.

### BACK PRESSURE VALVES

#### Control flow, precisely.

Introducing Milton Roy MRV series backpressure valves to optimize your dosing system, precisely.

#### Features:

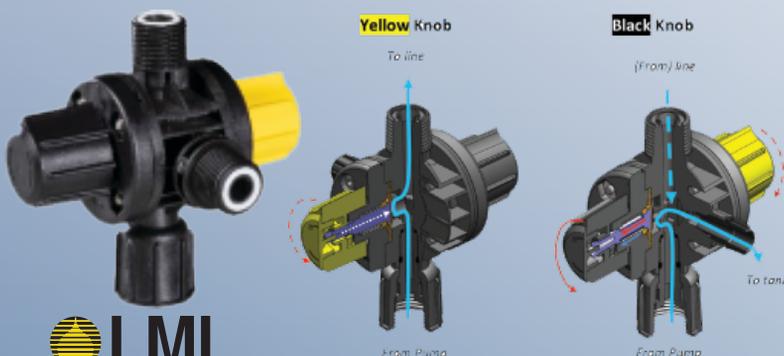

- Available in CPVC, PP, PVDF & SS material of constructions.
- Long life single sealing diaphragm.
- Field adjustable pressure setting (7 – 150 PSIG).
- Built-in air release & Optional gauge port.
- Available in socketed, threaded, flanged & union connections.
- Available for higher pressure & temperature rating against request.

#### Benefits:

- Reduce chemical discharge to optimum level through accurate dosing.
- Supplies a constant discharge back pressure allowing pump's ball check to function perfectly, ensuring repeatability and accuracy.
- Ensure perfect flow even if dosing tank installed at higher elevation.
- Backpressure helps the pump work under a constant load, thereby increasing the pump life.
- Additional built-in design feature is the anti-syphon function from the process line.

### MULTI-FUNCTION VALVES

MFV adds Performance, Safety, and Convenience to a metering pump system.

The new multifunction valve, MFV, extends your metering pump to provide critical functionality such as back pressure, pressure relief, priming and other key functions into a single valve.

The integrated design mounts directly on the liquid end of the pump as a cost effective solution to address common challenges in chemical metering applications.

## AUTOMATIC CAPACITY CONTROLLERS

The Actuator Capacity Controller (ACC) is a compact, robustly designed controller that optimizes flow, precision, reliability and integration with Milton Roy® pumps.

### FEATURES

- High level of modulating accuracy to remote control the pumps.
- Explosion-proof certified versions available: IECEx, CSA NEMA 7, ATEX
- Watertight IP68-NEMA 4
- Special offshore version for O&G applications
- Flexible adjustment for flow rate 1:10 ratio to meet API 675 standard
- 85V - 260VAC 1 Phase 50/60 Hz, 24VDC
- Mechanical position indicator integrated inside cover to conveniently check stroke levels
- Manual override integration for manual flow adjustment as needed

## INSTALLATION & COMMISSIONING

We understand and care about your Milton Roy equipment as much as you do. And, we understand how important it is to your business.

Our global team is trained to perform erection, Installation, Commissioning & Site testing of all of our products.

## HEALTH CHECK-UP

The service team has specialist skills and depth of knowledge of all Milton Roy related products. We can service and repair your equipment ranging from basic pumps to mixers to the most complex of systems.

We are able to come to your site and do full audits of your Equipment and Spares, leaving you with a detailed plan of where your equipment is on site and what we would recommend for complete spare coverage.

We offer on-site health checks, covering: flow and pressures, oil levels, vibration, noise, temperature, seal integrity, etc.

## TRAINING

Milton Roy offers product training for customers at any of our offices or on site.

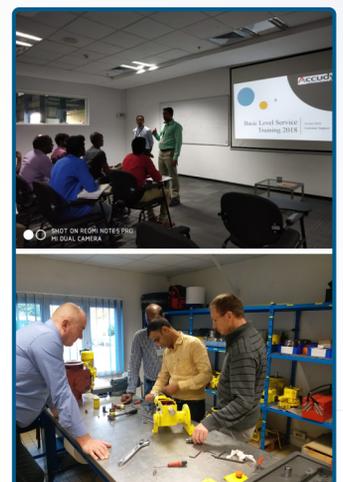

The Training courses include:

- Theory of Operation
- Troubleshooting
- Cleaning Procedures
- Servicing and Preventive Maintenance

Our classes can be tailor-made to suit your individual needs.

Classes accommodate 4 to 40 people and cover all aspects of Milton Roy's product range.

We also have a comprehensive range of e-learning packages that have been specifically designed to suit small or large companies with varying degrees of training requirements.
